legendaries. bear tank guide 3.3.5. bears in tank tops. bear tank glyph. bear tank guide

It is a pretty rudimentary take on the tank battle game. There's no online mode so you're going to need to get a group of friends together and you're going to need to hook up controllers to your pc if you want more than one player so keep that in mind. One of the more fun things to do is if you can manage to flip a tank onto its front by pressing B on an xbox controller than you can bullet hop by using the fire button. Being only a dollar means it is a fine pick up if you want a fun night with friends of tank warfare. I suggest tipsy town as a fun map.. It is a pretty rudimentary take on the tank battle game. Patch 0.3.130 : Patch notes for update 0.3.130: - Added timed rotators used for simple back-forth rotation (cleavers in graveyard). - Added 11 alternate meshes for simple lanes (rightclick on the placed mesh) - This will be expanded further to all lane meshes. - Fixed rotators not being spawned for clients on some custom maps. - Fixed issue where aim would not reset.. Patch 0.3.139e Re-Release : Patch notes for update 0.3.139: - Added 'Master Transformer' to the editor. Allows objects to move, rotate and/or scale at the same time. - Added French translation. (Thanks Patipat!) - Added physical properties to numerous objects. - Updated collision of numerous objects. - Updated lotus to be selectable. (Thanks Paulson!) - Various smaller improvements. - Fixed fatal error caused by broken LOD's while joining custom maps.. Patch 0.3.145 : Patch notes for update 0.3.145: - Added simple text-tool in editor. - Added 7 new lanes to the editor.. Patch 0.4.2e : Patch notes for update 0.4.2: - Changed spawn logic for dynamic lanes. - Fixed issue with goal lanes changing material while editing. - Various other fixes/improvements. 0.4.2b: - Fixed issue with dynamic lanes having faulty collisions 0.4.2c: - Fixed dynamic lanes resetting roll in editor 0.4.2d: - Fixed issues and reduced load time of dynamic lanes. - Fixed issue where master transformers could only use grassland assets. - Changed save-position in local multiplayer to last stopped location instead of last hit location. - Small physic change to stop ball at high velocity from going through geometry. - Various other fixes/improvements. 0.4.2e: - Fixed crash caused by PhysX taking too long to calculate collisions for dynamic lanes We are currently working on a few major features which will take some time to complete so expect a few smaller changes in the meantime. - VR-Support (HTC vive first), you will be able to play together with non VR friends. - PhysX changes to fix high-velocity sphere collision on some walls and grounds. - Importing own Assets (3D and 2D) to the editor and workshop.. Patch 0.4.6 : Patch notes for Update 0.4.6: - Added optional setting to show scoreboard after every hole. - Fixed numerous network related issues. - Fixed servers multiplying inside the server browser. - Fixed issues related to resetting in some custom maps. - Removed unnecessary logic in the editor causing lags when stopping playing. - Various code changes for future updates. (increasing size of this patch) - Various other fixes/improvements.
